SUBJECT INDEX TO VOLUME 28 (1987)

Nervous system (incl. skull)

The labyrinthine portion of the facial canal—A comparative radioanatomic investigation 17
The labyrinthine portion of the facial canal in patients with Bell's palsy investigated by computed tomography 25
Intermittent cerebrospinal liquorrhea—Cerebral computed tomography in the non-drop period . . 189
Comparison of the accumulation kinetics of L-(methyl-^{11}C)-methionine and D-(methyl-^{11}C)-methionine in brain tumors studied with positron emission tomography 225
Computed tomography of the cerebellopontine cistern in normal and acoustic tumor patients 231
Effects of intravascular contrast media on blood-brain barrier—Comparison between iothalamate, iohexol, iopentol and iodixanol 329
In vivo measurement of water self diffusion in the human brain by magnetic resonance imaging . . . 353
Magnetic resonance imaging of intracranial neoplasms at 0.02 tesla 369
Technical aspects on magnetic resonance imaging of the spine at 1.5 tesla 375
Does cerebral angiography of cadaveric kidney donors interfere with graft function? 451
Persisting intraventricular fat-fluid levels following surgery on a ruptured dermoid cyst of the posterior fossa 489
Application of a kinetic model on the methionine accumulation in intracranial tumours studied with positron emission tomography 505
Percutaneous phenol block of the upper thoracic sympathetic chain with computed tomography guidance 511
The Symposium Neuroradiologicum 657
Contrast enhanced magnetic resonance imaging of the brain using gadolinium-DTPA 659
Magnetic resonance imaging in small lesions of the central nervous system—Improvement by gadolinium-DTPA 667
Positron emission tomography with ^{11}C-methionine and computed tomography of intracranial tumours compared with histopathologic examination of multiple biopsies 673
Treatment of direct carotid-cavernous fistulas with detachable balloons 683

Ear, nose, throat and eye

The labyrinthine portion of the facial canal—A comparative radioanatomic investigation 17
The labyrinthine portion of the facial canal in patients with Bell's palsy investigated by computed tomography 25
Radiography and ultrasonography in paranasal sinusitis 31
Computed tomography of intraorbital foreign bodies 235
Radiographic findings after cricopharyngeal myotomy 555
Computed tomography of the submandibular salivary glands 693

Bones, joints and soft tissue

Pharyngeal function in patients with rheumatoid arthritis of the cervical spine and temporomandibular joint 35
Computed tomography of humeral head cup arthroplasties—A preliminary report 71
Magnetic resonance imaging of local soft tissue inflammation using gadolinium-DTPA 79
A normal variant simulating Freiberg's disease . . . 85
Radiographic changes in the condyle of the temporomandibular joint in psoriatic arthritis 185
Conventional radiography in transient synovitis of the hip in children 193
Magnetic resonance imaging in diffuse malignant bone marrow diseases 199
Magnetic resonance relaxation characteristics of muscle, fat and bone marrow of the extremities —Normal values in a low field strength unit . . . 363
Technical aspects on magnetic resonance imaging of the spine at 1.5 tesla 375
Spinal pseudarthrosis in ankylosing spondylitis . . . 383
Sonography in differential diagnosis of deep venous thrombosis of the leg 457
A simplified roentgen stereophotogrammetric method —Analysis of small movements between the prosthetic stem and the femur after total hip replacement 603
Correlation between radiologic and clinical findings in Charnley total hip replacement—A 10-year follow-up study 607

Conventional spinal radiography as a supplement to the neurologic assessment in myelomeningocele . 615
Magnetic resonance imaging on hemophilic arthropathy of the knee 621
Anatomic variations of the accessory soleus muscle 627
$^{99}Tc^{m}$-MDP and $^{99}Tc^{m}$-DPD in pathologic bone lesions—A visual and quantitative comparison . . . 631
Disc degeneration in the thoracolumbar junctional region—Evaluation by radiography and discography in autopsy 755

Cardiovascular system

Complications after percutaneous transluminal angioplasty of peripheral and renal arteries 3
Magnetic resonance imaging in primary amyloidosis 13
Chest radiography in the carcinoid syndrome 49
Asymptomatic leiomyosarcoma of the inferior vena cava—Incidental finding at ultrasonography . . . 181
Arterial wall stiffness in insulin-dependent diabetes mellitus—An in vivo study 207
Venous thrombosis after cardiac catheterization in infants 241
Digital subtraction angiography in Takayasu arteritis 247
Light and electron microscopic observations in atherosclerotic rabbits following experimental transluminal angioplasty 323
Computed tomography following endoscopic sclerotherapy of esophageal varices 415
Transcatheter embolization for treatment of acute lower gastrointestinal bleeding 425
Sonography in differential diagnosis of deep venous thrombosis of the leg 457
Intraarterial doxorubicin infusion treatment with and without occlusion of the renal artery in rabbit renal VX-2 carcinoma—Establishing an animal model . 467
Digital subtraction angiography with bandpass filtration during by-pass operation 491
Oblique views in magnetic resonance imaging of the heart by combined axial rotations 497
Postrenal segment aneurysm and infrahepatic interruption of the inferior vena cava—A case report . 545
Blood flow determinations utilizing digital densitometry 635
Determination of flow velocities from magnetic resonance multiple spin-echo images—A phantom study 643
Vasoactivity of verapamil in the canine hindlimb and sympathetic nervous system interaction 649
Treatment of direct carotid-cavernous fistulas with detachable balloons 683
Radiologic and endoscopic diagnosis of duodenal angioma 735
Horseshoe lung with multiple congenital anomalies —Case report and review of the literature 751
Hemodynamic effect of percutaneous transluminal angioplasty for lower limb atherosclerosis—A study based on pulsed Doppler ultrasound flowmetry 761
Iohexol and ioxaglate in peripheral angiography . . 767

Mediastinum and respiratory system

Chest radiography after minor chest trauma 53
Magnetic resonance imaging for assessment of treatment effects in mediastinal Hodgkin's disease . . 145
Magnetic resonance imaging, chest radiography, computed tomography and ultrasonography in malignant lymphoma 253
Radiologic observations in severe neonatal respiratory distress syndrome treated with the isolated phospholipid fraction of natural surfactant 389
Computed tomography of anterior mediastinal tumors—Differentiation between thymoma and germ cell tumor 395
Computed tomography of the thymus gland in myasthenia gravis 399
Mediastinal involvement in adults with lymphoblastic lymphoma 403
Digital radiography of the chest by self-scanning linear diode arrays 461
Diagnostic value of ultrasonography in hydatid disease in abdomen and chest 743
Chest radiography and computed tomography in the evaluation of mediastinal adenopathy in lymphoma 747
Horseshoe lung with multiple congenital anomalies—Case report and review of the literature 751

Digestive tract

Pharyngeal function in patients with rheumatoid arthritis of the cervical spine and temporomandibular joint 35
Computed tomography in early diagnosis of local recurrence of rectal carcinoma 41
The upper esophageal sphincter area 173
Esophageal carcinoma—Radiologic appearance of minimal lesions 177
Radiologic diagnosis of gastro-oesophageal reflux—Comparison of barium and low-density contrast medium 295
Pharyngeal dysfunction after total and subtotal oesophagectomy 409
Accuracy of radiologic and endoscopic diagnosis of gastric ulcer 421
Transcatheter embolization for treatment of acute lower gastrointestinal bleeding 425
Radiographic findings after cricopharyngeal myotomy 555
Videodefaecography combined with measurement of the anorectal angle and of perineal descent 559
Mesenteric panniculitis 727

Radiologic quantitation of gastro-oesophageal reflux—Correlation between height of food stimulated gastro-oesophageal reflux and level of histologic changes in reflux oesophagitis 731
Radiologic and endoscopic diagnosis of duodenal angioma 735

Liver, biliary tract

Balloon catheter dilatation of stenotic common bile duct anastomoses in the pig—A preliminary investigation 115
Site and number of liver tumors recorded at angiography and computed tomography compared with the findings at laparotomy and of resected liver specimens 153
Ultrasound diagnosis of liver hydatid disease 161
Ultrasonography and scintigraphy of the liver in focal and diffuse disease 165
Effect of repeated normothermic ischaemia on normal liver parenchyma—An experimental study in pigs 215
Biologic effects of ultrasound on liver cells of rat embryos 221
Intra-arterial injection of adriamycin/mitomycin C Lipiodol suspension in liver metastases 275
Ultrasound examination in diffuse liver disease —Clinical significance of enlarged lymph nodes in the hepato-duodenal ligament 281
Etiologic significance of anatomic variations in the main intrahepatic bile ducts in hepatolithiasis . . 285
Percutaneous transsplenic embolization of esophageal varices in a 5-year-old child 299
Radiologic diagnosis of liver metastases in colo-rectal carcinoma—Prospective evaluation of the accuracy of angiography, ultrasonography, computed tomography and computed tomographic angiography 431
Spleen/liver ratio in RES-scintigraphy—A comparison between posterior registration and emission computed tomography 439
An attempt to characterize malignant lymphoma in spleen, liver and lymph nodes with magnetic resonance imaging 527
Angiography, computed tomography, magnetic resonance imaging and ultrasonography in detection of liver metastases from endocrine gastrointestinal tumours 535
Adverse reactions to iotroxate at intravenous cholangiography—A prospective clinical investigation and review of the literature 571
Hepatic cavernous hemangioma in patients at high risk for liver cancer 697
Relaxation enhancement of the dog liver and spleen by biodegradable superparamagnetic particles in proton magnetic resonance imaging 703
Effects of metrizoate and iohexol on the liver at visceral angiography 707
Ultrasonography in carcinoma of the gallbladder . . 711
Ultrasonography in carcinoma of the gallbladder —Diagnostic difficulties and pitfalls 715
Digitized intra-operative video-fluoroscopy cholangiography—An analysis of 100 cases 719

Spleen, pancreas

The spleen in non-Hodgkin lymphoma—Diagnostic value of computed tomography 139
Comparison of endoscopic retrograde pancreatography with functional and histologic changes in chronic pancreatitis 289
Percutaneous transsplenic embolization of esophageal varices in a 5-year-old child 299
Spleen/liver ratio in RES-scintigraphy—A comparison between posterior registration and emission computed tomography 439
An attempt to characterize malignant lymphoma in spleen, liver and lymph nodes with magnetic resonance imaging 527
Ultrasonically guided fine-needle aspiration biopsy in focal pancreatic lesions 541
Relaxation enhancement of the dog liver and spleen by biodegradable superparamagnetic particles in proton magnetic resonance imaging 703
Aspiration biopsy of the spleen in patients with sarcoidosis 723

Abdomen

Sensitivity of ^{111}In-granulocyte scintigraphy in various local infections 549
Herniographic appearance of the lateral inguinal fossa 563
Mesenteric panniculitis 727
Diagnostic value of ultrasonography in hydatid disease in abdomen and chest 743

Urogenital system

Complications after percutaneous transluminal angioplasty of peripheral and renal arteries 3
Computed tomography after percutaneous renal stone extraction 55
Use of ^{99}Tc^{m} radionuclides to show nephrotoxicity of cyclosporin A in transplanted kidneys 59
Artificial urinary sphincters—Radiographic evaluation 63
Contrast-enhanced computed tomography in carcinoma of the urinary bladder—The use of different injection methods 67
The upper urinary tract—Pyelography and interventional procedures 129

Preoperative renal tumor embolization—A useful procedure? 303
Contrast-enhanced computed tomography to show perivesical extension in bladder carcinoma 307
Angiography in non-functioning renal allografts receiving cyclosporin A 313
Therapeutic value of hysterosalpingography with Lipiodol ultra fluid 319
Urinary protein profiles following urography with iothalamate—A preliminary report 335
Alternating use of ^{123}I and ^{131}I hippuran for routine postoperative monitoring of transplanted kidneys is impracticable 365
Distribution of renal scars and intrarenal reflux in children with a past history of urinary tract infection 443
Computed tomography in renal replacement lipomatosis 447
Does cerebral angiography of cadaveric kidney donors interfere with graft function? 451
Intraarterial doxorubicin infusion treatment with and without occlusion of the renal artery in rabbit renal VX-2 carcinoma—Establishing an animal model 467
Gadolinium-DTPA enhancement of VX-2 carcinoma of the rabbit kidney on T1 weighted magnetic resonance images 479
Low dose pelvimetry with biplane digital radiography 577
Renal function measured by x-ray fluorescence analysis—A comparison between contrast medium clearance and non-simultaneous ^{51}Cr-EDTA clearance 581
Estimating kidney function during urography—Comparison of contrast medium clearance and simultaneous ^{51}Cr-EDTA clearance 587
Comparison of ionic and non-ionic nitroxide spin labels for urographic enhancement in magnetic resonance imaging 593
Proton T1 relaxation time of normal and abnormal urine 601
Combination of DMSA-scintigraphy and hippuran renography in unilateral obstructive nephropathy —Improved prediction of recovery after intervention 653
Computed tomography of malignant ovarian disease 739

Retroperitoneum

Influence of section spacing on reliability of abdominal computed tomography in early stage non-seminomatous testicular tumor 169
Shape of retroperitoneal lymph nodes at computed tomography does not correlate to metastatic disease in early stage non-seminomatous testicular tumors 271

Endocrine system

Chest radiography in the carcinoid syndrome 49
Angiography, computed tomography, magnetic resonance imaging and ultrasonography in detection of liver metastases from endocrine gastrointestinal tumours 535

Lymphatic system

The spleen in non-Hodgkin lymphoma—Diagnostic value of computed tomography 139
Magnetic resonance imaging for assessment of treatment effects in mediastinal Hodgkin's disease . . 145
Influence of section spacing on reliability of abdominal computed tomography in early stage non-seminomatous testicular tumor 169
Magnetic resonance imaging, chest radiography, computed tomography and ultrasonography in malignant lymphoma 253
Lymphography and abdominal computed tomography in the staging of non-Hodgkin lymphoma . . 263
Shape of retroperitoneal lymph nodes at computed tomography does not correlate to metastatic disease in early stage non-seminomatous testicular tumors 271
Ultrasound examination in diffuse liver disease —Clinical significance of enlarged lymph nodes in the hepato-duodenal ligament 281
Mediastinal involvement in adults with lymphoblastic lymphoma 403
An attempt to characterize malignant lymphoma in spleen, liver and lymph nodes with magnetic resonance imaging 527
Chest radiography and computed tomography in the evaluation of mediastinal adenopathy in lymphoma 747
Demonstration of the thoracic duct by ^{123}I heptadecanoic acid—Report of a case 783

Breast

Breast necrosis associated with thromboembolic disorders 517
Excretion of iohexol and metrizoate in human breast milk 523

Computed tomography

The labyrinthine portion of the facial canal in patients with Bell's palsy investigated by computed tomography 25
Computed tomography in early diagnosis of local recurrence of rectal carcinoma 41
Computed tomography after percutaneous renal stone extraction 55
Contrast-enhanced computed tomography in carcino-

ma of the urinary bladder—The use of different injection methods 67
Computed tomography of humeral head cup arthroplasties—A preliminary report 71
The spleen in non-Hodgkin lymphoma—Diagnostic value of computed tomography 139
Site and number of liver tumors recorded at angiography and computed tomography compared with the findings at laparotomy and of resected liver specimens 153
Influence of section spacing on reliability of abdominal computed tomography in early stage non-seminomatous testicular tumor 169
Intermittent cerebrospinal liquorrhea—Cerebral computed tomography in the non-drop period . . 189
Conventional radiography in transient synovitis of the hip in children 193
Computed tomography of the cerebellopontine cistern in normal and acoustic tumor patients 231
Computed tomography of intraorbital foreign bodies 235
Magnetic resonance imaging, chest radiography, computed tomography and ultrasonography in malignant lymphoma 253
Lymphography and abdominal computed tomography in the staging of non-Hodgkin lymphoma—With an analysis of discrepancies 263
Shape of retroperitoneal lymph nodes at computed tomography does not correlate to metastatic disease in early stage non-seminomatous testicular tumors 271
Contrast-enhanced computed tomography to show perivesical extension in bladder carcinoma 307
Computed tomography of anterior mediastinal tumors—Differentiation between thymoma and germ cell tumor 395
Computed tomography of the thymus gland in myasthenia gravis 399
Mediastinal involvement in adults with lymphoblastic lymphoma 403
Computed tomography following endoscopic sclerotherapy of esophageal varices 415
Radiologic diagnosis of liver metastases in colo-rectal carcinoma—Prospective evaluation of the accuracy of angiography, ultrasonography, computed tomography and computed tomographic angiography 431
Computed tomography in renal replacement lipomatosis 447
Radiation dose and somatic risk from computed tomography 483
Persisting intraventricular fat-fluid levels following surgery on a ruptured dermoid cyst of the posterior fossa 489
Percutaneous phenol block of the upper thoracic sympathetic chain with computed tomography guidance—A new technique 511
Angiography, computed tomography, magnetic resonance imaging and ultrasonography in detection of liver metastases from endocrine gastrointestinal tumours 535
Sensitivity of ^{111}In-granulocyte scintigraphy in various local infections 549
Anatomic variations of the accessory soleus muscle 627
Positron emission tomography with ^{11}C-methionine and computed tomography of intracranial tumours compared with histopathologic examination of multiple biopsies 673
Computed tomography of the submandibular salivary glands 693
Hepatic cavernous hemangioma in patients at high risk for liver cancer 697
Mesenteric panniculitis 727
Computed tomography of malignant ovarian disease 739
Chest radiography and computed tomography in the evaluation of mediastinal adenopathy in lymphoma 747
Spatial distribution of dose in computed tomography with special reference to thin-slice techniques . . 771
Attenuation values, volume changes and artifacts in tissue due to freezing 779

Ultrasound

Radiography and ultrasonography in paranasal sinusitis 31
Ultrasound diagnosis of liver hydatid disease 161
Ultrasonography and scintigraphy of the liver in focal and diffuse disease 165
Asymptomatic leiomyosarcoma of the inferior vena cava—Incidental finding at ultrasonography . . . 181
Arterial wall stiffness in insulin-dependent diabetes mellitus—An in vivo study 207
Biologic effects of ultrasound on liver cells of rat embryos 221
Magnetic resonance imaging, chest radiography, computed tomography and ultrasonography in malignant lymphoma 253
Ultrasound examination in diffuse liver disease —Clinical significance of enlarged lymph nodes in the hepato-duodenal ligament 281
Percutaneous transsplenic embolization of esophageal varices in a 5-year-old child 299
Radiologic diagnosis of liver metastases in colo-rectal carcinoma—Prospective evaluation of the accuracy of angiography ultrasonography, computed tomography and computed tomographic angiography 431
Sonography in differential diagnosis of deep venous thrombosis of the leg 457
Angiography, computed tomography, magnetic resonance imaging and ultrasonography in detection of liver metastases from endocrine gastrointestinal tumours 535

Ultrasonically guided fine-needle aspiration biopsy in focal pancreatic lesions 541
Sensitivity of ^{111}In-granulocyte scintigraphy in various local infections 549
Ultrasonography in carcinoma of the gallbladder . . 711
Ultrasonography in carcinoma of the gallbladder —Diagnostic difficulties and pitfalls 715
Diagnostic value of ultrasonography in hydatid disease in abdomen and chest 743
Hemodynamic effect of percutaneous transluminal angioplasty for lower limb atherosclerosis—A study based on pulsed Doppler ultrasound flowmetry 761

Nuclear radiology

Use of ^{99}Tc^{m} radionuclides to show nephrotoxicity of cyclosporin A in transplanted kidneys 59
Ultrasonography and scintigraphy of the liver in focal and diffuse disease 165
Comparison of the accumulation kinetics of L-(methyl-^{11}C)-methionine and D-(methyl-^{11}C)-methionine in brain tumors studied with positron emission tomography 225
Alternating use of ^{123}I and ^{131}I hippuran for routine postoperative monitoring of transplanted kidneys is impracticable 365
Spleen/liver ratio in RES-scintigraphy—A comparison between posterior registration and emission computed tomography 439
Application of a kinetic model on the methionine accumulation in intracranial tumours studied with positron emission tomography 505
Sensitivity of ^{111}In-granulocyte scintigraphy in various local infections 549
^{99}Tc^{m}-MDP and ^{99}Tc^{m}-DPD in pathologic brain lesions—A visual and quantitative comparison . . . 631
Combination of DMSA-scintigraphy and hippuran renography in unilateral obstructive nephropathy —Improved prediction of recovery after intervention 653
Positron emission tomography with ^{11}C-methionine and computed tomography of intracranial tumours compared with histopathologic examination of multiple biopsies 673
Demonstration of the thoracic duct by ^{123}I heptadecanoic acid—Report of a case 783

Magnetc resonance imaging

Magnetic resonance imaging in primary amyloidosis 13
Gadolinium-DTPA enhancement of experimental soft tissue carcinoma and hemorrhage in magnetic resonance imaging 75
Magnetic resonance imaging of local soft tissue inflammation using gadolinium-DTPA 79
Magnetic resonance imaging for assessment of treatment effects in mediastinal Hodgkin's disease . . 145
Magnetic resonance imaging in diffuse malignant bone marrow diseases 199
Magnetic resonance imaging, chest radiography, computed tomography and ultrasonography in malignant lymphoma 253
Evaluation of relaxation time measurements by magnetic resonance imaging—A phantom study . . . 345
In vivo measurement of water self diffusion in the human brain by magnetic resonance imaging . . . 353
Magnetic resonance relaxation characteristics of muscle, fat and bone marrow of the extremities —Normal values in a low field strength unit . . . 363
Magnetic resonance imaging of intracranial neoplasms at 0.02 tesla 369
Technical aspects on magnetic resonance imaging of the spine at 1.5 tesla 375
Gadolinium-DTPA enhancement of VX-2 carcinoma of the rabbit kidney on T1 weighted magnetic resonance images 479
Oblique views in magnetic resonance imaging of the heart by combined axial rotations 497
An attempt to characterize malignant lymphoma in spleen, liver and lymph nodes with magnetic resonance imaging 527
Angiography, computed tomography, magnetic resonance imaging and ultrasonography in detection of liver metastases 535
Comparison of ionic and non-ionic nitroxide spin labels for urographic enhancement in magnetic resonance imaging 593
Proton T1 relaxation time of normal and abnormal urine 601
Magnetic resonance imaging in hemophilic arthropathy of the knee 621
Determination of flow velocities from magnetic resonance multiple spin-echo images—A phantom study 643
Contrast enhanced magnetic resonance imaging of the brain using gadolinium-DTPA 659
Magnetic resonance imaging in small lesions of the central nervous system—Improvement by gadolinium-DTPA 667
Hepatic cavernous hemangioma in patients at high risk for liver cancer 697
Relaxation enhancement of the dog liver and spleen by biodegradable superparamagnetic particles in proton magnetic resonance imaging 703

Pediatric radiology

Conventional radiography in transient synovitis of the hip in children 193
Venous thrombosis after cardiac catheterization in infants 241

Percutaneous transsplenic embolization of esophageal varices in a 5-year-old child 299
Radiologic observations in severe neonatal respiratory distress syndrome treated with the isolated phospholipid fraction of natural surfactant 389
Distribution of renal scars and intrarenal reflux in children with a past history of urinary tract infections 443
Conventional spinal radiography as a supplement to the neurologic assessment in myelomeningocele 615

Interventional radiology

Complications after percutaneous transluminal angioplasty of peripheral and renal arteries 3
Computed tomography after percutaneous renal stone extraction 55
Balloon dilatation of stenotic common bile duct anastomoses in the pig—A preliminary investigation 115
The upper urinary tract—Pyelography and interventional procedures 129
Intra-arterial injection of adriamycin/mitomycin C Lipiodol suspension in liver metastases 275
Percutaneous transsplenic embolization of esophageal varices in a 5-year-old child 299
Preoperative renal tumor embolization—A useful procedure? 303
Therapeutic value of hysterosalpingography with Lipiodol ultra fluid 319
Light and electron microscopic observations in atherosclerotic rabbits following experimental transluminal angioplasty 323
Computed tomography following endoscopic sclerotherapy of esophageal varices 415
Transcatheter embolization for treatment of acute lower gastrointestinal bleeding 425
Percutaneous phenol block of the upper thoracic sympathetic chain with computed tomography guidance—A new technique 511
Ultrasonically guided fine-needle aspiration biopsy in focal pancreatic lesions 541
Treatment of direct carotid-cavernous fistulas with detachable balloons 683
Aspiration biopsy of the spleen in patients with sarcoidosis 723
Hemodynamic effect of percutaneous transluminal angioplasty for lower limb atherosclerosis—A study based on pulsed Doppler ultrasound flowmetry 761

Experimental radiology

Gadolinium-DTPA enhancement of experimental soft tissue carcinoma and hemorrhage in magnetic resonance imaging 75
Effect of ionic and non-ionic contrast media on aggregation of red blood cells in vitro—A preliminary report 87
Cytotoxic effects of six angiographic contrast media on human endothelium in culture 99
Double blind evaluation of the effects of various contrast media on extremity veins in the dog . . . 107
Balloon catheter dilatation of stenotic common bile duct anastomoses in the pig—A preliminary investigation 115
Effect of repeated normothermic ischaemia on normal liver parenchyma—An experimental study in pigs 215
Biologic effects of ultrasound on liver cells of rat embryos 221
Comparison of the accumulation kinetics of L-(methyl-^{11}C)-methionine and D-(methyl-^{11}C)-methionine in brain tumors studied with positron emission tomography 225
Light and electron microscopic observations in atherosclerotic rabbits following experimental transluminal angioplasty 323
Effects of intravascular contrast media on blood-brain barrier—Comparison between iothalamate, iohexol, iopentol and iodixanol 329
Intraarterial doxorubicin infusion treatment with and without occlusion of the renal artery in rabbit renal VX-2 carcinoma—Establishing an animal model 467
Formation of potential antigens from radiographic contrast media 473
Gadolinium-DTPA enhancement of VX-2 carcinoma of the rabbit kidney on T1 weighted magnetic resonance images 479
Blood flow determinations utilizing digital densitometry 635
Determination of flow velocities from magnetic resonance multiple spin-echo images—A phantom study 643
Vasoactivity of verapamil in the canine hindlimb and sympathetic nervous system interaction 649
Relaxation enhancement of the dog liver and spleen by biodegradable superparamagnetic particles in proton magnetic resonance imaging 703
Attenuation values, volume changes and artifacts in tissue due to freezing 779

Contrast media and other drugs

Use of $^{99}Tc^{m}$ radionuclides to show nephrotoxicity of cyclosporin A in transplanted kidneys 59
Gadolinium-DTPA enhancement of experimental soft tissue carcinoma and hemorrhage in magnetic resonance imaging 75
Magnetic resonance imaging of local soft tissue inflammation using gadolinium-DTPA 79

Effect of ionic and non-ionic contrast media on aggregation of red blood cells in vitro—A preliminary report 87
Adverse reactions following two separate intravascular injections of contrast media in the same patient—A comparison between iohexol and monomeric ionic media 93
Cytotoxic effects of six angiographic contrast media on human endothelium in culture 99
Double blind evaluation of the effects of various contrast media on extremity veins in the dog . . . 107
Addition of local anesthetics to contrast media—I—Effects on patient discomfort and hemodynamics in aortofemoral angiography 209
Intra-arterial injection of adriamycin/mitomycin C Lipiodol suspension in liver metastases 275
Angiography in non-functioning renal allografts receiving cyclosporin A 313
Effects of intravascular contrast media on blood-brain barrier—Comparison between iothalamate, iohexol, iopentol and iodixanol 329
Urinary protein profiles following urography with iothalamate—A preliminary report 335
Radiologic observations in severe neonatal respiratory distress syndrome treated with the isolated phospholipid fraction of natural surfactant 389
Does cerebral angiography of cadaveric kidney donors interfere with graft function? 451
Intraarterial doxorubicin infusion treatment with and without occlusion of the renal artery in rabbit renal VX-2 carcinoma—Establishing an animal model 467
Formation of potential antigens from radiographic contrast media 473
Gadolinium-DTPA enhancement of VX-2 carcinoma of the rabbit kidney on T1 weighted magnetic resonance images 479
Excretion of iohexol and metrizoate in human breast milk 523
Adverse reactions to iotroxate at intravenous cholangiography—A prospective clinical investigation and review of the literature 571
Renal function measured by x-ray fluorescence analysis—A comparison between contrast medium clearance and non-simultaneous ^{51}Cr-EDTA clearance 581
Estimating kidney function during urography—Comparison of contrast medium clearance and simultaneous ^{51}Cr-EDTA clearance 587
Comparison of ionic and non-ionic nitroxide spin labels for urographic enhancement in magnetic resonance imaging 593
Vasoactivity of verapamil in the canine hindlimb and sympathetic nervous system interaction 649
Contrast enhanced magnetic resonance imaging of the brain using gadolinium-DTPA 659
Magnetic resonance imaging in small lesions of the central nervous system—Improvement by gadolinium-DTPA 667
Relaxation enhancement of the dog liver and spleen by biodegradable superparamagnetic particles in proton magnetic resonance imaging 703
Effects of metrizoate and iohexol on the liver at visceral angiography 707
Iohexol and ioxaglate in peripheral angiography . . 767

Physics and technique

Clinically acceptable tolerance of roentgen generator exposure parameters 121
Sensitometric control of roentgen film processors . 339
Evaluation of relaxation time measurements by magnetic resonance imaging—A phantom study . . . 345
In vivo measurement of water self diffusion in the human brain by magnetic resonance imaging . . . 353
Digital radiography of the chest by self-scanning linear diode arrays 461
Radiation dose and somatic risk from computed tomography 483
Digital subtraction angiography with bandpass filtration during by-pass operation 491
Low dose pelvimetry with biplane digital radiography 577
A simplified roentgen stereophotogrammetric method—Analysis of small movements between the prosthetic stem and the femur after total hip replacement 603
Blood flow determinations utilizing digital densitometry 635
Determination of flow velocities from magnetic resonance multiple spin-echo images—A phantom study 643
Digitized intra-operative video-fluoroscopy cholangiography—An analysis of 100 cases 719
Spatial distribution of dose in computed tomography with special reference to thin-slice techniques . . 771
Attenuation values, volume changes and artifacts in tissue due to freezing 779

Book reviews
